

# The People's Assembly, convening on the 8th of November 2021 under the 6th Extraordinary PA Meeting.

The Assembly, recognising the current situation,

Constitutes that the server has 0 hours of activity per week for the last months,  
Constitutes that many people have nostalgia for the oldest server and want to rebuild.  
Affirms its possibility through the People's Assembly and the Council of the Server;  
Establishes the following motion:

1. To wipe the server clean and load up a world with the same seed as the initial world run on the server ("azureScapegoat") in 1.17.1
2. To set up a small PA building in spawn (formerly Osbos) while RedPanda\_4 prepares to build a new PA in Liberdade
3. To give the CotS full powers to do anything for a transitionary period which is ended at their discretion

And proceeds.

Signed by,
