

The People's Assembly, convening on the 23rd of September 2020 under the 24th PA Meeting.

The Assembly, recognising the current situation,

Constitutes it is needed to rewrite the function, abilities and context of the universal constitution originally written by azureScapegoat, and resolve the question of Azuristan and the situation of new players. And accepts the following:

New people join stateless, and can live in Osbos or outside of any claimed territory.

Azuristani citizens will have a vote on their form of government.

A set of universal rights (states can in themselves or between states adapt these rules if a notice is given) will be accepted:

1. Nobody shall build in another state its territory or too close to it.
2. Principally you can not kill someone else without their consent.
3. Nobody may grief, including entities.
4. Nobody may steal, including entities.

For new players these may be simplified as:

Nobody will built in someone else's territory or too close to it

Nobody will kill another without their consent

Nobody will grief or kill someone else's animals

Nobody will steal

And proceeds.
