

The People's Assembly, convening on the 26th of July 2022 under the 21st PA Meeting.

The Assembly, recognising the current situation,

Constitutes the need to implement the advanced machines plugin, giving the PA three votes:

1. Whether to implement it at all
2. To implement the block placer
3. To implement the arrow turret

If votes 2 and 3 get rejected, 1 automatically gets rejected too as it is only about these 2 machines specifically.

Plugin: <https://www.spigotmc.org/resources/advanced-machines-lite.71731/>

And proceeds.
