

The People's Assembly, convening on the 29th of August 2023 under the 37th PA Meeting.

The Assembly, recognising the current situation,

Constitutes the need to add the SpeedRoads plugin. It allows you to make high speed roads by making custom layers of blocks to make the road with varying speeds. I was thinking we could have one level of speed for having 1 layer of redstone block under the main block and an extra speedy version if you put 2 layers of redstone blocks under the main road. (See appendix A for the link) This to enable creating more infrastructure projects for the server and making transportation even faster.

And proceeds.
