

The People's Assembly, convening on the 27th of January 2021 under the 39th PA Meeting.

The Assembly, recognising the current situation,

Constitutes the need to instate that all means of production shall be public. A state may not deprive anyone of the right to labour and to enjoy the fruits of those labour with the means of production, save with regards individual contraptions (like farms) which constitute means of production from which a state excludes an individual for an objectively justifiable cause such as improper use. This motion does not affect the rights of the several states to exclude people from entrance and stay within their territory insofar it is not abused so as to effect privatisation. Motion 26-3: To always have a public version of a privatised farm and a public pool of elytras for lending is superseded insofar it concerns farms. Reason: The ancient traditions of the server ensured harmony and peace. These ought to be reintroduced so as to ensure everyone is suited with needed materials.

And proceeds.
