

The People's Assembly, convening on the 23rd of December 2020 under the 36th PA Meeting.

The Assembly, recognizing the current situation,

Constitutes the need to thoroughly reform the People's Assembly in order for it to smoothly work and create a server for the average person;

Affirms its ability to do so through this motion;

Rejects the severe compromises leading to an unhappy resolution;

Guided by the motions, guidelines, behaviors, and precedents set by the PA;

Desiring a solution to proceed, establishes the following motion:

1. A full codification of the customs and precedents of the People's Assembly and its organization, committees, and papers is in order. This includes the following addition to article 0 of the charter: "The International High Court may be referred to as the IHC in this document."

2. A following replacement for the Technical Committee is to be in place:

The Technical Committee to be replaced with the Council of the Server, guided by the Leader of the Council of the Server and the Head of the Council of The Server, with their responsibilities being being the figurehead and coordinator respectively, occupied by RedPanda_4 and _yoran_ respectively. The Leader of the Council of the Server together with the Head of the Council of the Server to bring forth the first interpretation of any enacted motions, and execute them with the entire Council of the Server. Such interpretation may be overruled by the People's Assembly. Constituting the following as permanent members of the Council of the Server: the Head of the Council of the Server, the Leader of the Council of the Server, and the Speaker of the House. The Head of the Council of the Server together with the Leader of the Council of the Server may decide to temporarily enlist another member into it, if one of these disagrees with the other, the other may replace the requirement with themselves + the majority of the Council of the Server. If either the Leader of the Council of the Server or the Head of the Council of the Server leaves their position the remaining position with at least 1/3rd approval of the Council of the Server appoints a person to the empty position.

The main responsibilities of the Council of the Server are to be:

1. Keeping the server fully functioning.
2. Executing the will of the People's Assembly.
3. Running the administrative of the People's Assembly.
4. Bringing forth the first interpretation for any enacted motion.

The Speaker of the House is to preserve its role as the technical owner of the People's Assembly discord server. All members of the Council of the Server are to have a role in the People's Assembly discord server with all permissions. The Speaker of the House must be appointed with 2/3rd of the People's Assembly and the endorsement of either the Leader of the Council of the Server or the Head of the Council of the Server.

Further members of the Council of the Server may be appointed or recalled with a motion by the People's Assembly, requiring the endorsement of either the Leader of the Council of the Server or the Head of the Council of the Server. In case this requirement is not met the requirements shift to be: the endorsement of the Speaker of the House and passing with 2/3rd of the People's Assembly in a vote.

Any other duties of the Technical Committee are to be renamed appropriately and inherited to the Council of the Server.

3. An extension of article 2 of the charter is to be in place, stating its non-interference with domestic issues within one state. Further binding the People's Assembly and the Council of the Server to a level of subsidiarity. And adding: "Nothing contained in this charter shall authorize the People's Assembly to intervene in matters which are essentially within the domestic jurisdiction of any state or shall require the Members to submit such matters to settlement under the present charter; but this principle shall not prejudice the application of enforcement measures under the Universal Rules."

4. Amending the Rules of Criminal Procedure in the International High Court to require the same accessibility options as laid down in the charter under the following articles:

1.7 – To notify everyone, by enacting a similar requirement under the following text: "The judge of the IHC case must make sure all members are notified in the PA discord."

1.9 – Online availability, by enacting a similar requirement under the following text: "Any representative can choose to follow the case online in the PA Discord rather than being present on the Minecraft server. If a person chooses to type it must be in the PA discord rather than the Minecraft server."

5. Adopting the following resolutions to inspire activity:

Amending the inactivity rule under article 1.5 of the charter to 30 days rather than the current 45 days. Retaining the exception where if there is a valid reason known. Adding an exception for these times to be frozen if the server is down.

6. Adopting the following resolution to inspire meeting attendance:

Any person who put in a motion to get their community/state recognized and/or become a speaker or take up any other position within the PA must be present in the meeting debating the motion unless a reason as to why this is not possible is given. If this reason is deemed invalid by the PA or there is no reason given it may adjourn the motion up to two times after which it may revoke the motion.

7. Adopting the following resolution under the Technical Committee (or of as this motion the Council of the Server):

1. If the Council of the Server notices an emergency, they must act as soon as possible in accordance with their first responsibility. This may include temporarily shutting the server down.

2. If the server is shut down, by either the Council of the Server or other causes, the Council of the Server must notify the People's Assembly as soon as possible and convene to seek a way to resolve the situation. They may choose to hold an extraordinary meeting as result.

3. The Council of the Server must seek to keep the People's Assembly as informed as possible.

3.1 The People's Assembly may call for a Q&A session with the Council of the Server. This must be organized as soon as possible, with a maximum time of 24 hours, and at least either the Leader of the Council of the Server or the Head of the Council of the Server must be present with a preference for both. Here questions must be answered as honestly as possible. Such a session may only be called for after 24 hours and with 24 hours in between each unless the Council of the Server authorized more to be held.

8. Seeking to free the democratic process by amending article 1.13 to state the following:

"For a motion to pass it needs a majority of votes."

and amending article 1.11 to state the following:

"Representatives can choose to revoke a motion if the motion is a repeat from the last meeting or very similar to it (except for motions derived from an extraordinary meeting mandated by 1.14.3) if the representatives are in consensus."

9. Further adopting resolutions relating to the IHC, namely:

The IHC may call upon the Council of the Server to research possible evidence if it is strongly suggested that a suspect is guilty.

The IHC may split the meeting into several parts if both parties and the judge agree.

10. Enacting a resolution for the People's Assembly in regards to the Council of the Server:

The PA may call upon the Council of the Server for technical research relating to the server as long as this does not expose critical information for the IHC (if so, the PA request must be delayed) or expose personal information about someone.

And proceeds.

Signed by,

yoran

[Motion 36-1: A People's Assembly which works for You]
