

The People's Assembly, convening on the 2nd of March 2021 under the 44th PA Meeting.

The Assembly, recognising the current situation,

Constitutes the need to establish standards as to make the publication of the server a viable solution to the ever lasting problem of the lack of players. This because too many players will bring destruction as will too little players.

Standards include:

The server will remain whitelisted.

All players that find it from the public servers list will have to wait up to 24 hours before they can start being admitted into the server.

They will also need to have a discord account that is older than 2 months as to insure that it's their main account and not a burner one. This requirement is reduced to one week if the person is close friends or family from an already established player.

Every month only 15 players will be admitted through this process.

The players should first join when a mod is in vanish (this might require growing the moderator team).

Any application is to be considered by the CotS.

And proceeds.

Signed by,
eldegron
