

08/02/2026 Leader of the Council of the Server letter to the Council of the Server, the People's Assembly and the Head Representatives of relevant Recognized Entities.
Information: P2C5T

To hereby inform the addressed,

Following the recent trimming of the overworld a new borders map has been created. This map revealed that despite repeated efforts to prevent losses, half of the eastern claim of the Republic of Vandebilt had been deleted – the head representative did not indicate this regarding the proposed deletion map. The loss has since been restored and reinstated on dynmap.

The previous borders have been mostly maintained into the new map, but with the following crucial changes:

1. Motion 33-1: New Argosian claim – has been revoked (and hence the claim removed) as this lies deep within trimmed territory. The Argosian head representative gave authorization for this under PA norm 9 and C4.1.4 on M56-1.
2. Motion 49-6: To recognize the new Porpoistani territory – has been slightly altered, as a sliver of the claim is within trimmed territory, the border has been adjusted to curve around the trim; this is around X-9200,Z5640. The head representative gave authorization for this under PA norm 9 and C4.1.4 on M56-1.
3. Motion 58-3: For Liberdade to co-own the PA – the current motion is divergent from the initiator's text, as the referred to territory (marked in magenta) is named in reference to PA infrastructure, but was intended to convey the co-owned territory, with the areas related to PA infrastructure not being marked. Further confusion regarding the possible inverse then being true and hence the light blue markings being the PA related infrastructure area is to be discarded, as its a separate marking for M58-6 which is currently adjourned. The new legislated situation shall be that the areas marked in magenta, namely the PA, is co-owned by Liberdade; and that additionally Liberdade is prohibited from expanding claims in Osbos in the future except for PA related infrastructure, the area of which is currently unmarked. This is made into effect under C4.1.4, and to undo this a motion from the People's Assembly will be necessary.
4. The Porpoistani border at the new People's Assembly station has been adjusted to follow more closely the deepest part of the river. The head representative of the Republic of Porpoistan and the mayor of Osbos have given authorization for this. As this regards a negligible reinterpretation of the intended line it shall be in effect with this under PA norm 9, C4.1.4 and LoOSnp&w on M56-1 and for reversal a motion from the People's Assembly will be necessary as well as it passing scrutiny under C2.
5. The Argosian border at X300,Z800 has been moved slightly into the territory that is "half-claimed" (indicated by dots). The Argosian head representative gave authorization for this under PA norm 9 and C4.1.4 on M56-1.
6. Argos now claims the 3 mountainous islands with jungles around X-900,Z1335 – essentially the WHS. The Argosian head representative gave authorization for this. This will have to be confirmed in a motion to the People's Assembly (as it is beyond the scope of PA norm 9).
7. Syndria has an expanded claim around the northern island, claiming a peninsula to the west and waters nearby. The head representative gave authorization for this under PA norm 9 and C4.1.4 on M56-1.
8. Porpoistan and The Emeralda Islands have respectively expanded and created dotted claims to the unclaimed forests between Wēkulpar and Quava. The respective head representatives have given authorization for this under PA norm 9 and C4.1.4 on M56-1.
9. Porpoistan and The Emeralda Islands have expanded their borders in the Lavaria region to fully touch, which has caused The Emeralda Islands to claim a piece of water. The head representative gave authorization for this under PA norm 9 and C4.1.4.

10. Syndria has additionally claimed the forest to the north of the northern island, and the accompanying waters to the west. This will have to be confirmed in a motion to the People's Assembly (as it is beyond the scope of PA norm 9).

In summary the procedural followup will be as follows:

Above numbered changes 1, 2, 5, 7, 8 and 9 will be in effect in 48 hours under PA norm 9 supplemented by C4.1.4. Numbered change 4 will be in effect in 48 hours too under PA norm 9 together with C4.1.4 and LoOSnp&w.

Numbered change 3 will be in effect immediately under C4.1.4.

Numbered changes 6 and 10 will only be in effect once the relevant motion has passed.

Any other minor changes are unintentional, and as always the map is not meant to be exact down to the block to determine the border. If the discrepancy is noticeable, it should be communicated to the LoCotS who will rectify it.
