18/3/2025 Council of the Server to the Council of the Server
Information: P1C5T

To hereby inform the People's Assembly,
On 18/3/2025 a new plugin has been implemented under C4.1.1 in order to further protect the server. The change specifically entails the TCPShield/RealIP plugin, as part of a broader service to protect the server's IP from being exposed to the internet, and sequentially protects against DDOS or false logon attempts.
Additionally, this has resulted in the "server's IP" (hostname) being changed to germania.lunarflower.site.
