The People's Assembly, convening on the 28th of October 2020 under the 29th PA Meeting.

The Assembly, recognising the current situation,

Constitutes the need for the craftable cobweb datpack where you can make 9 string into a cobweb and vice versa. This because cobweb is a non-renewable block that is necessary in some redstone contraptions. It helps slow down entities. It's also a good decoration block. Currently it only spawns in some structures like mineshafts and stronghold libraries.

And proceeds.

Signed by,
Anaizy

[Motion 29-2: To add a datapack to make cobweb craftable from 9 pieces of string, and make it unraftable too]
